

SUJAL PRAJAPATI

Computer Engineering Student | Aspiring Software Developer

☎ 9773441229 ✉ sbprajapati310707@gmail.com 🔗 LinkedIn 🐙 GitHub 📍 Ahmedabad, India

PROFESSIONAL SUMMARY

Computer Engineering student and aspiring Software Developer with hands-on experience building full-stack web applications using **Django REST Framework**, **React**, and **Node.js**. Skilled in database design (**MySQL**, **PostgreSQL**, **MongoDB**), **REST API development**, **JWT authentication**, and applying **machine learning (scikit-learn)** to real-world matching problems. Proven ability to independently design, build, and deploy end-to-end systems across four original projects spanning AI-driven platforms, role-based management systems, and data-structure-driven applications.

EDUCATIONS

LJ University | Ahmedabad, Gujarat
B.E./B.Tech in Computer Engineering

2024 - 2028
SPI : 8.58/ 10

PROJECTS

InfluencerHub | 🐙 Github

Full-Stack Creator-Business Collaboration Platform

- Built a full-stack platform connecting creators and businesses for campaign management, collaborations, contracts, and sponsorships.
- Designed an **AI-based creator-matching engine** using a **Random Forest model** trained on creator and campaign attributes to automate recommendation matching.
- Implemented secure **JWT authentication** with role-based access control, real-time chat, and WebSocket-based live notifications.
- Delivered analytics dashboards, campaign tracking, review system, and an integrated AI assistant to support end-to-end platform workflows.

Technologies / Tools Used : Django REST Framework, React, Python, SQLite, scikit-learn, JWT

University Attendance Management System | 🐙 Github

Role-Based Attendance System

- Developed a role-based attendance system supporting three user roles (Admin, Teacher, Student) with distinct dashboards and permissions.
- Built CRUD operations for students, teachers, courses, subjects, and classes using **SQLAlchemy ORM**.
- Engineered attendance tracking with duplicate-entry prevention, automated percentage calculation, and low-attendance alerts.
- Implemented secure authentication, role-based access control, dashboard statistics, and automated PDF report generation.

Technologies / Tools Used : Python, Flask, Flask-SQLAlchemy, MySQL, HTML, CSS, JavaScript

Pharmacy Management System | 🐙 Github

Desktop Pharmacy Management System

- Built a desktop pharmacy management system handling user authentication, product management, and real-time inventory search.
- Designed a custom singly linked list data structure for efficient product storage and filtering.
- Integrated **JDBC (PreparedStatement, ResultSet)** for reliable, SQL-injection-safe CRUD database operations.
- Applied **OOP principles** with modular DAO architecture, exception handling, and input validation for maintainable code.

Technologies / Tools Used : Java, JDBC, MySQL, OOP, Data Structures

Theater Management System | 🐙 Github

- Developed a Java-based theater management application using object-oriented design principles and a modular architecture.
- Implemented seat reservation, ticket booking, show scheduling, and customer management with booking conflict prevention.
- Designed an intuitive interface and optimized booking workflows to improve ticket allocation accuracy and user experience.

Technologies / Tools Used : Java, OOP Principles, Software Design

SKILLS

Databases :	MySQL, PostgreSQL, MongoDB, SQLite, phpMyAdmin
Frameworks & Libraries :	Django, Django REST Framework, Node.js, Express.js, React, scikit-learn, Bootstrap, Tailwind CSS
Languages :	English, Hindi
Programming Languages :	Python, Java, JavaScript, SQL
Tools & Platforms :	Git, GitHub, VS Code, XAMPP

CERTIFICATIONS

- Introduction to Java** — LearnQuest, Coursera | Dec 2024
- Inheritance and Data Structures in Java** — University of Pennsylvania, Coursera | Jul 2025
- Introduction to HTML, CSS, & JavaScript** — IBM, Coursera | Dec 2025
- Exploratory Data Analysis for Machine Learning** — IBM, Coursera | Jun 2026
